AB - J01279804 White ant proofing tape and sheet is obtd. by mixing white
ant preventing agent in adhesive layer in one face or in both faces of
a tape or a sheet.

- White ant preventing agent are organo-phosphate-type (e.g., chlorpyrifos), naphthalene-type and triazine-type insecticides. Adhesive agents used are not alkaline one (e.g., solvent-type rubber, acrylic adhesives, silicone-type adhesives, non-solvent hot-melting-type, oligomer-type, water soluble resin-type). Tape or sheet is made of paper, cloth, unwoven cloth, polyolephine, polyurethane and inorganics tissue. Sheet is used for treatment of the soil, and tape is used for wood. This tape or sheet is prepd. by mixing 1-5 wt.% of an insecticide with an adhesive agent, and then, coating the adhesive agent to a tape or a sheet.

- **USE/ADVANTAGE** - This tape or sheet is useful for preventing white ant. The tape or sheet is easy to handle and saving time when applying to the soil or wood. White ant preventing agent is not scattering in this method, and safety in work operations is greatly improved. Environmental pollution can be overcome by retaining the active component on tapes or sheets.(0/0)
